WVOA Virtual Training Session
Wisconsin DNR Updates
May 21, 2020

WVOA is dedicated to providing operation training opportunities during the COVID-19 related Safer at Home Order and period of social distancing. Join us for a 2-hour session covering a wide range of Wisconsin DNR Updates as outlined in the agenda.

This will be a Zoom Webinar starting at 11 a.m. CST on May 21, 2020. We ask that you register in advance at wvoa.org.

Notes on earning and receiving DNR credits: **log in with full name and operator certification number**. Sign in information, day of, will be used for verification of your participation in the training with the DNR. It is very important for you to sign in to the training with your full name and operator certification number if you want credit hours. Also, there will be screen shots taken of the participants at the start of the training (5 minutes into the training), at the 1 hour mark, 2 hour mark/at the end to verify participation. As part of the verification of the training process, there will be a question or two that will be asked by the trainer(s) that will need to be answered by each participant. This answer will likely be a very short answer that will need to be posted by each individual in attendance of the training.

About the speaker:

Amy Garbe

Amy Garbe is a Wastewater Engineer with the Department of Natural Resources. Previously she handled compliance within the Southern part of the state along with AM/WQT projects and Phosphorus Variances statewide. Recently, she transitioned to the Statewide Wastewater Operations Engineer and Compliance Coordinator position in which she works statewide assisting with O&M Troubleshooting, Operator Certification, SSOs and CMARs.
